

Going to the Dentist

I have a dental appointment.
Going to the dentist helps to keep my teeth clean and healthy.

My visit to the dentist will be a little different this time because of a germ called COVID-19

I will have to wear a mask and when I get to the front desk, they might ask to take my temperature and use hand sanitizer.

At the waiting room, I can sit next to my parent, but I will need to sit 6 feet apart from other people. This will help keep me safe during my visit. I can ask to borrow my parent's phone while I wait for my turn.

When it's my turn, the assistant will take me into the exam room. The dentist and assistant will be wearing masks, face shields and gloves.

I get to sit in a fun chair that goes up and down! When it's time for my cleaning, the assistant will lay my chair back and turn on a bright light. They will also use special tools to check and clean my teeth.

When the dentist is done, I will have nice clean and shiny teeth!
I will feel proud and my parents will be proud too.
